

METERING OF WATER CONNECTIONS

As per CMWSS Act 1978 for the consumption of water supplied by the Board, the Board may determine the quantity consumed on the basis of reading recorded by a meter installed in the premises. Therefore, CMWSSB is sanctioning water connection to the premises with water meters to measure the consumption. In the first phase, Metrowater has decided to verify the existence of meters in all the multi storied and special buildings. It has also been decided to fix meters before 31.05.08 wherever meters are not installed or the meter is not functioning. (RES. NO. 72/2008 dt 31.03.08) Similarly, house service connections with sump are also to be metered. Hence, the consumers are requested to purchase a water meter with ISI mark from the market and hand over the same to the concerned Depot Engineer for testing. Meter testing charges of Rs.100/- has to be remitted by the consumer and the meter will be installed in the premises within a week's time after testing. Notice has been served to the consumers for fixing the meters to measure the consumption. The water meters with ISI marking of IS 779/94 and 2373/81 can be purchased from any leading hardware stores.
